

TITANIUM SPECIAL EDITION

▲ BAB3091BKTE

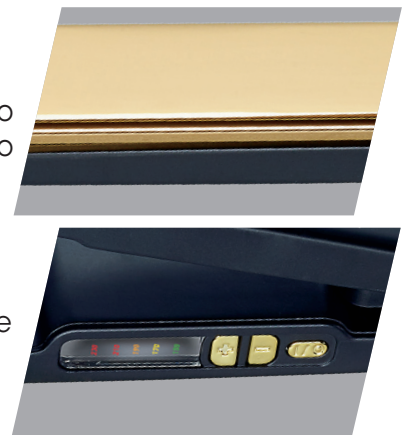

True Titanium plates give outstanding heat transfer into the hair so that you can still get great results at a lower temperature.

Ion boost technology produces a stream of active conditioning to remove static, smoothing the hair cuticle leaving every section frizz-free and beautifully shiny. With precise temperature adjustment to help prevent extreme heat damage and fast ceramic heat technology to ensure constant high heat across the plate at all times, this elegant straightener guarantees an exceptional, lasting finish on any hair type.

Titanium is extremely heat resistant - maintains its strength and stability to high temperatures and is an excellent conductor of heat, very resistant to chemicals and has an extremely smooth surface. It is strong and durable.

Temperature control from 150°C to 230°C allows use on any type of hair from the most fragile to the most difficult one, from the thinnest to the coarsest one

- > perfect straightening on all hair type
- > perfect for technical services (keratin straightening, Brazilian straightening...)

Features

- 28mm x 110mm Titanium plates
- Ionic technology
- Advanced Heat Management System™: immediate heat-up
- Temperature selector - 5 settings (150°C - 170°C - 190°C - 210°C - 230°C)
- On/off switch & temperature display
- Professional 2.70m swivel cord
- Heat protective shield
